AIMEN Technology Centre

ANFACO - CYTMA

CETIM – Technological Centre for Multisectoral Research

CTAG – Automotive Technology Centre of Galicia

GRADIANT – Galician R&D Centre in Advanced Telecommunications

ITG Technology Centre

An Alliance of 7 Technology Centres
leading **technological progress**,
committed to key industries and
devoted to businesses and society

CAPABILITIES

-  Automation and robotics
-  Bioenergy
-  Biotechnology
-  Connectivity and IoT
-  Quantum
-  Cybersecurity
-  Circular Economy
-  Advanced Manufacturing
-  Photonics
-  Engineering
-  Artificial Intelligence
-  Materials
-  Sensor Systems
-  Systems
-  Sustainability
-  Energy Transition
-  U-space

APPLICATION AREAS

- Aquaculture 
- Agricultural-Marine-Food 
- Aeronautics and RPAs 
- Water 
- Audiovisual 
- Construction 
- Educational 
- Energy 
- Forest 
- Logistics and transportation 
- Maritime and Shipbuilding 
- Metalworking industry 
- Mobility 
- Plastics 
- Chemical 
- Health and Pharma 
- Textile 
- Tourism 

+ 1 800

highly skilled individuals dedicated to research and knowledge transfer

+ 1 900

clients

+ 40

countries of origin for the clients

+ 1 70

patents, either proprietary or developed collaboratively

1 17.8M€

million euros in revenue, of which 63% comes from outside Galicia

+500

R&D&I projects applying technology

183

European and International R&D&i projects

143

national R&D&I projects

81

regional R&D&I projects

+ 16M€

in annual economic return for Galicia (from Europe)

10.6M€

of investments and acquisition of equipment

123

job offers in 2025, mostly in technological profiles

36

nationalities represented in the workforce

64%

exceed three years of stay at the same work centres

98%

long-term contracts out of the total existing in 2024

45%

women in the workforce of the 7 ATiGA centres

45222

hours of annual internal training for employees

ANFACO - CECOPESCA

CETIM – Technological Centre for Multisectoral Research

CTAG – Automotive Technology Centre of Galicia

GRADIANT – Galician R&D Centre in Advanced Telecommunications

ITG Technology Centre

Intersectoral Technological Alliance of Galicia represents the region's innovative ecosystem, **connecting talent with the productive fabric** to transform knowledge into real impact on the market and society

RECENT MILESTONES

AIMEN validates a **full-scale aeronautical demonstrator** that reduces weight by 35% and manufacturing defects by 80%

ANFACO-CYTMA creates the **first industrial prototype** for the smart production of microalgae as a high-value ingredient

CETIM leads research in bio-based advanced materials for timber, driving **structural CLT and SCL solutions** for construction

CTAG partners with Uvigo to pilot an **autonomous electric shuttle service** to validate mobility solutions under real-world conditions

GRADIANT launches the **TRL 13 investment fund** specialised in deep tech and creates two **spin-offs**: Kiur (eHealth) and DOKKEN (AI-powered document processing)

ITG develops **robotics and AI** for the Ministry of Defense to autonomously detect and neutralise explosive devices
